

**Project Manager. LandStudies, Inc.** is a diversified environmental and engineering firm with a commitment to environmental sustainability. We provide our clients with innovative design solutions to challenging environmental problems. LandStudies is a leader in stream and wetland restoration design, environmental and storm water planning and design. We recruit and hire the best and brightest in their respective fields of expertise. **LandStudies is currently seeking a professional engineer or environmental scientist with experience in water and environmental resource related projects. Experience and proficiency in Microstation and processing projects through the Maryland State Highway Administration (MDSHA) is preferred.**

Description / Requirements: Candidate should have a strong or working knowledge of some or all of the following skills as they relate to storm water management, culvert design, grading and drainage design, and erosion and sediment control practices. Experience with stream restoration assessment and geomorphology, channel stabilization techniques, hydrology and hydraulic principles, sediment transport mechanics, is a plus, but not a requirement for the position. Candidates should possess excellent verbal and written communication skills and the ability to work within a team environment.

Technical Skills and Experience: The preferred candidate will include some or all of the following skills: stormwater planning and design using low-impact development techniques, watershed management planning, water quality modeling, hydraulic and hydrologic modeling, geomorphic assessments, preparation of construction documents and estimates, and construction inspection. Familiarity with wetland and stream-related regulatory programs and permitting requirements, surveying, GPS equipment, MicroStation, AutoCAD, HEC-RAS, HEC-HMS or other hydrologic and/or hydraulic modeling is a plus.

General Skills and Experience: Must be fluent in MS Office products and must demonstrate good written and verbal skills. Must be skilled at task management and be able to organize data to obtain project-required information, compile and analyze data, and develop reports. Must understand and work within scope and budget constraints to accomplish tasks. Previous project management experience is a plus.

Moderate travel to project sites will be required. Some overnight travel will be required. Must be able and willing to work in field conditions. LandStudies offers a competitive benefits package. Salary will be commensurate with qualifications & experience. Please send a cover letter and resume to:
